

SOCIAL VALUES STATEMENT

At LHM Healthcare, we are committed to not only delivering exceptional clinical care but also actively contributing to the well-being of our communities by prioritizing patient-centred care, promoting health equity through accessible services, investing in staff development and wellbeing, actively engaging with local and national initiatives. Our intention is to foster a sustainable practice as a socially responsible Provider of Healthcare services.

Key elements to our approach:

- **Patient-centric focus:**
Our primary goal and the golden thread that links everything we do in the company is the provision of excellent and safe quality care tailored to individual patient needs.
- **Compassionate focus:**
We will help provide patient care on a compassionate basis to help those in need of Hyperbaric treatment but with limited means.
- **Community engagement:**
Our commitment is to actively participate in local health initiatives, that address community health disparities and support patients to access our services.
- **Supporting Charitable initiatives**
We will support diving charities, marine conservation, medical students and maritime heritage charities whose purpose aligns most closely with our company's ethos and goals.
- **Staff wellbeing:**
We will Invest in employee development and creating a supportive work environment to ensure optimal patient care.
- **Health equity:**
We are dedicated to providing equitable access to healthcare services for all demographics and supporting other providers to achieve similar goals.
- **Sustainability practices:**
Acknowledging environmental responsibility and incorporating sustainable practices within operations.
- **Participation in Research:**
We will support research into Hyperbaric and Diving Medicine that has the potential to benefit our community through participation in multi-centre clinical trials.

- **Promoting Awareness:**

We will promote the benefits of Hyperbaric medicine, diving safety and the awareness of decompression illness as well as its treatment through educational activities to our community.
